

Project: Part 2

Team name: ASMRS

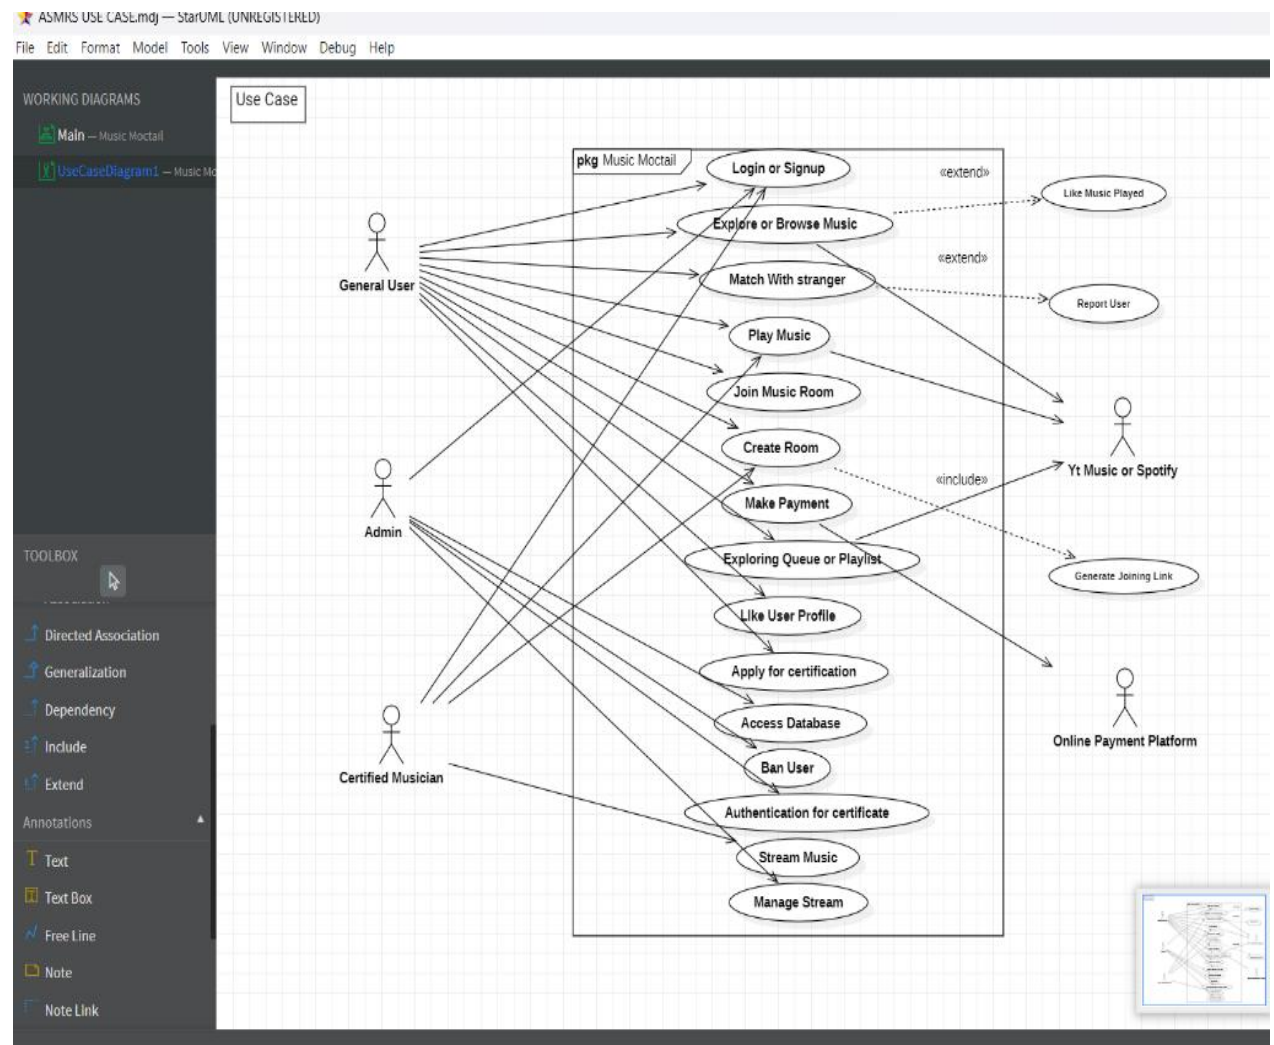

As mentioned in the previous report our project is website for music lovers where they can connect with random people, explore new music and create playlists in real time.

1) Use Case Diagram

As we can see there are 3 major actors in our website that is the general user, Admin and the certified musicians. The key elements each has can be clearly understood through the use case diagram given below.

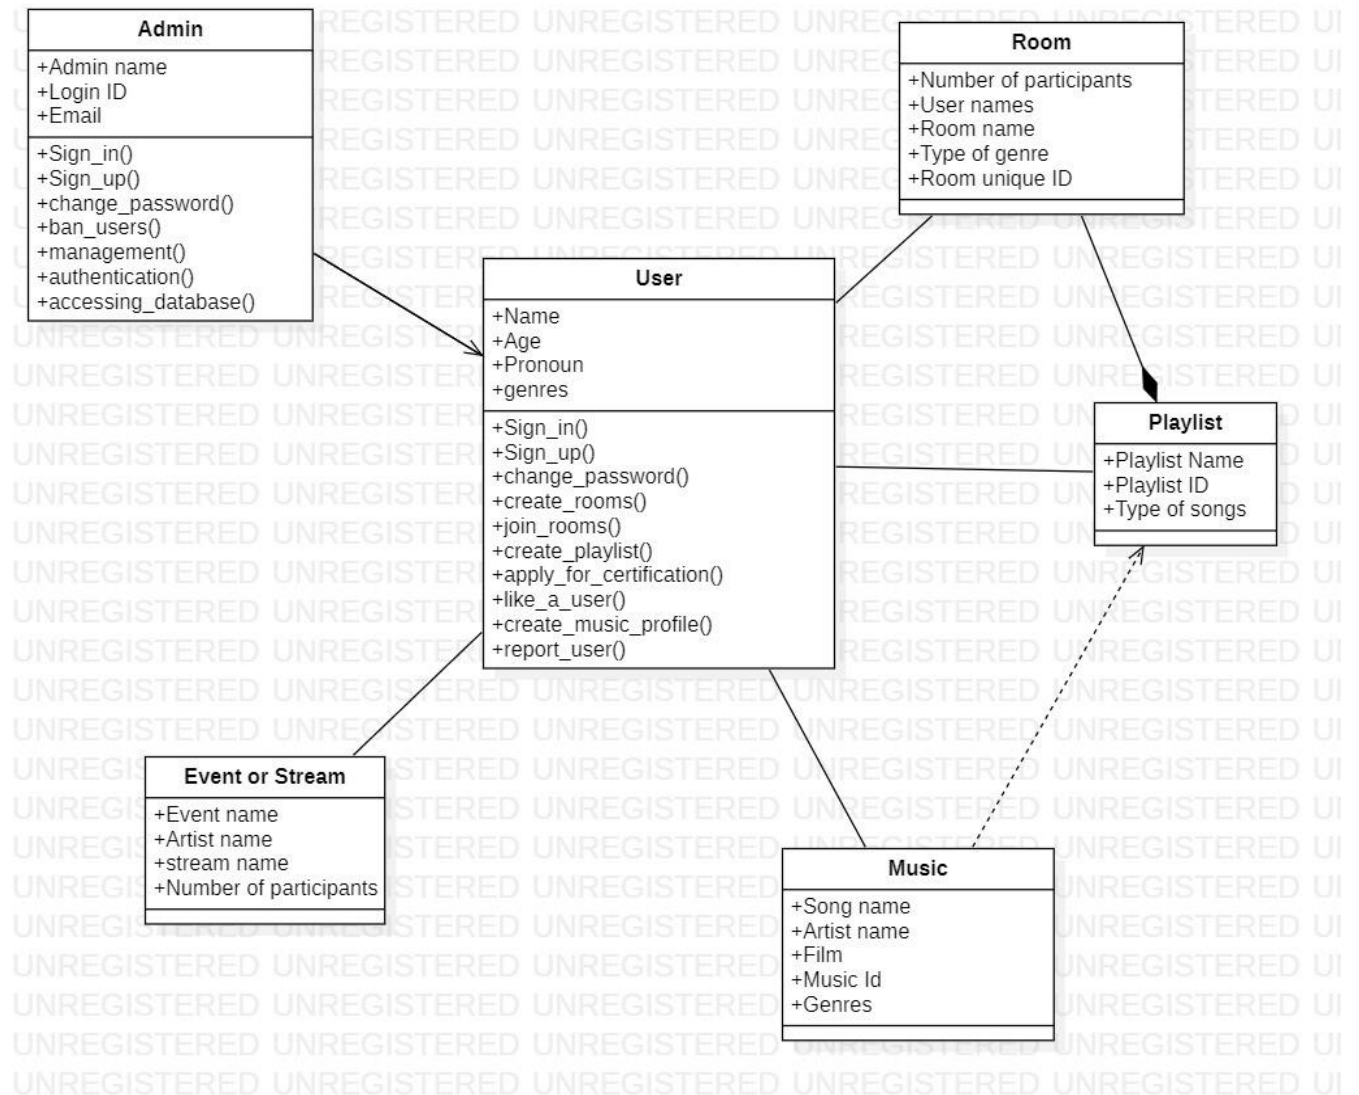

The software we used for making this use case diagram is StarUML.

2) Class Diagram:

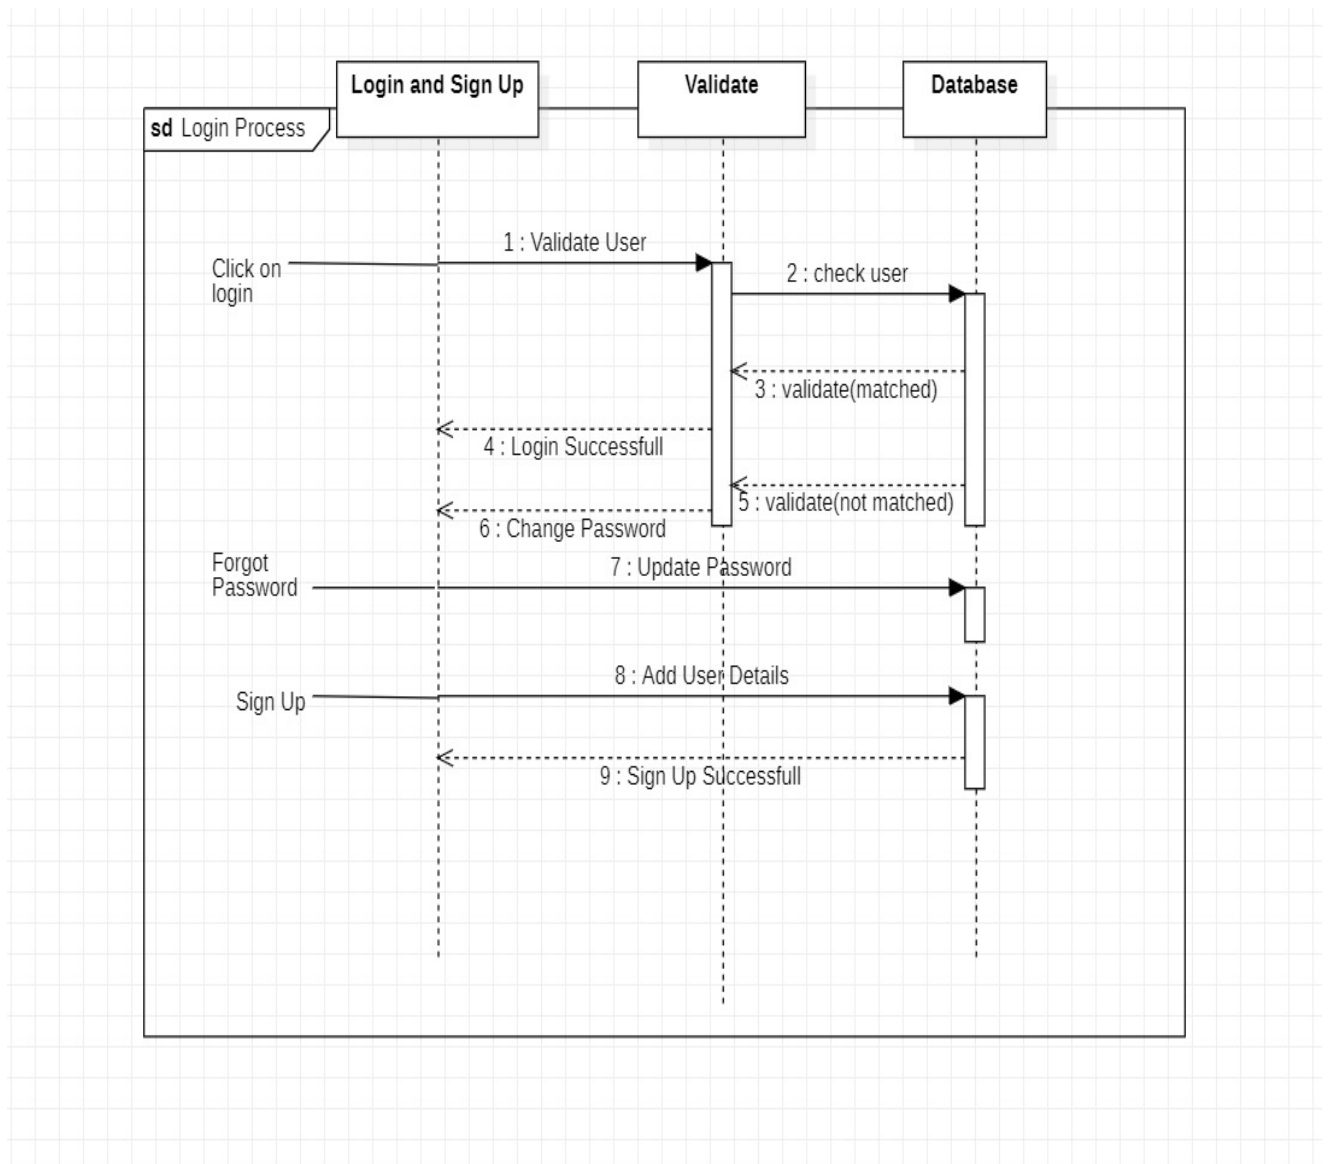

The below is the class diagram for our website.

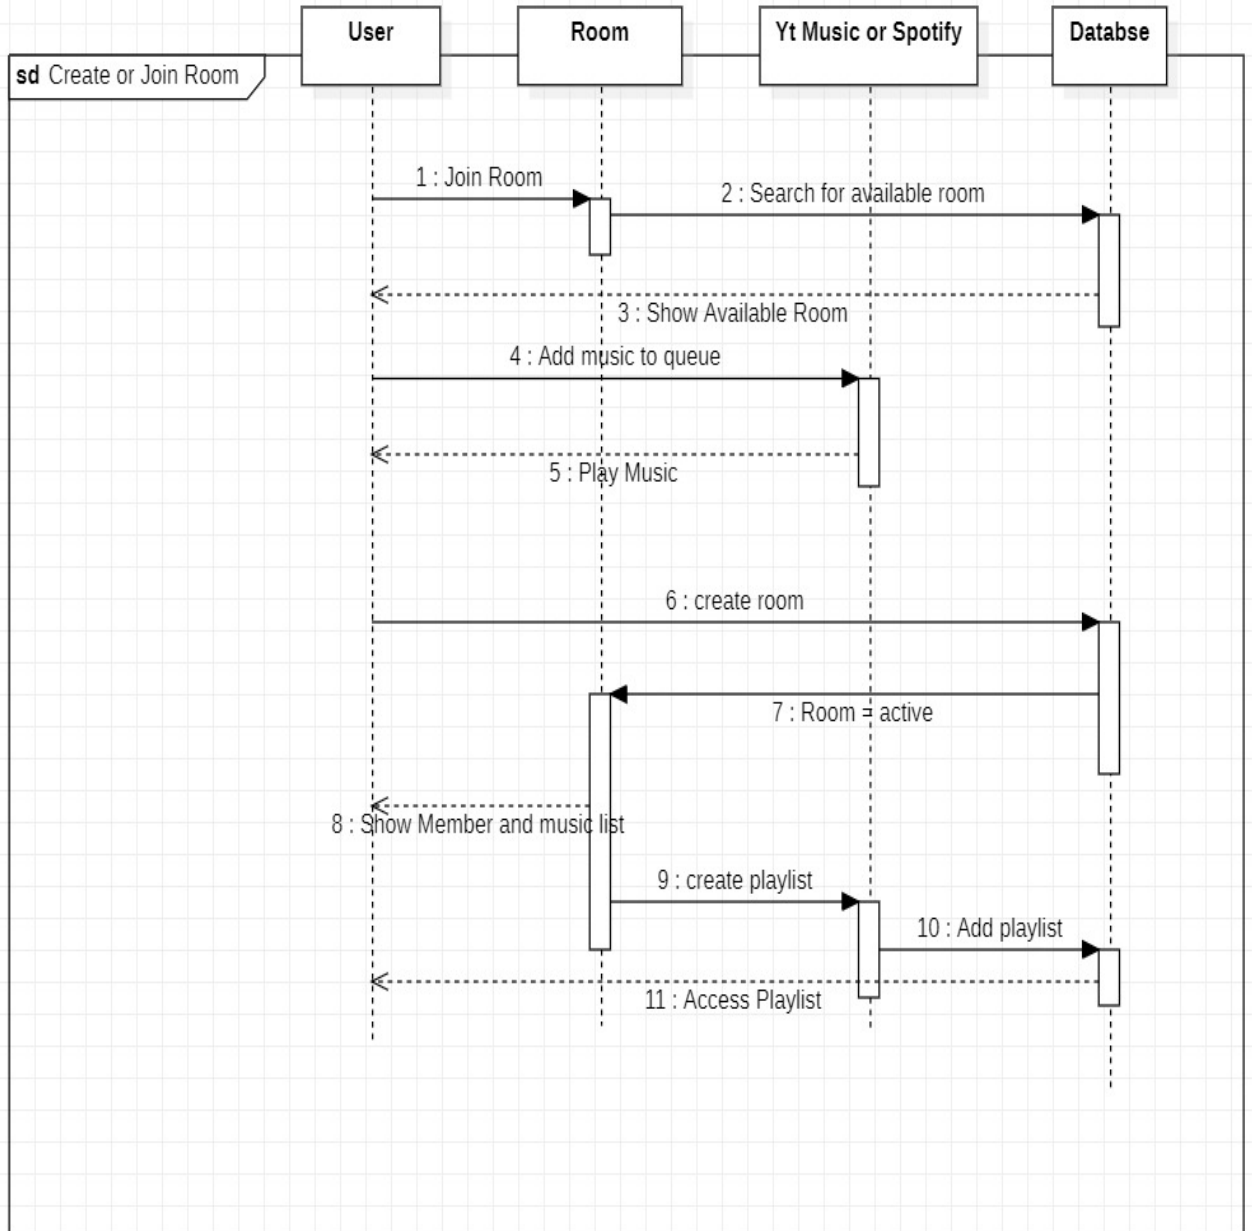

3) Sequence Diagram:

The below mentioned are the key processes that we used and the sequence diagrams for the same.

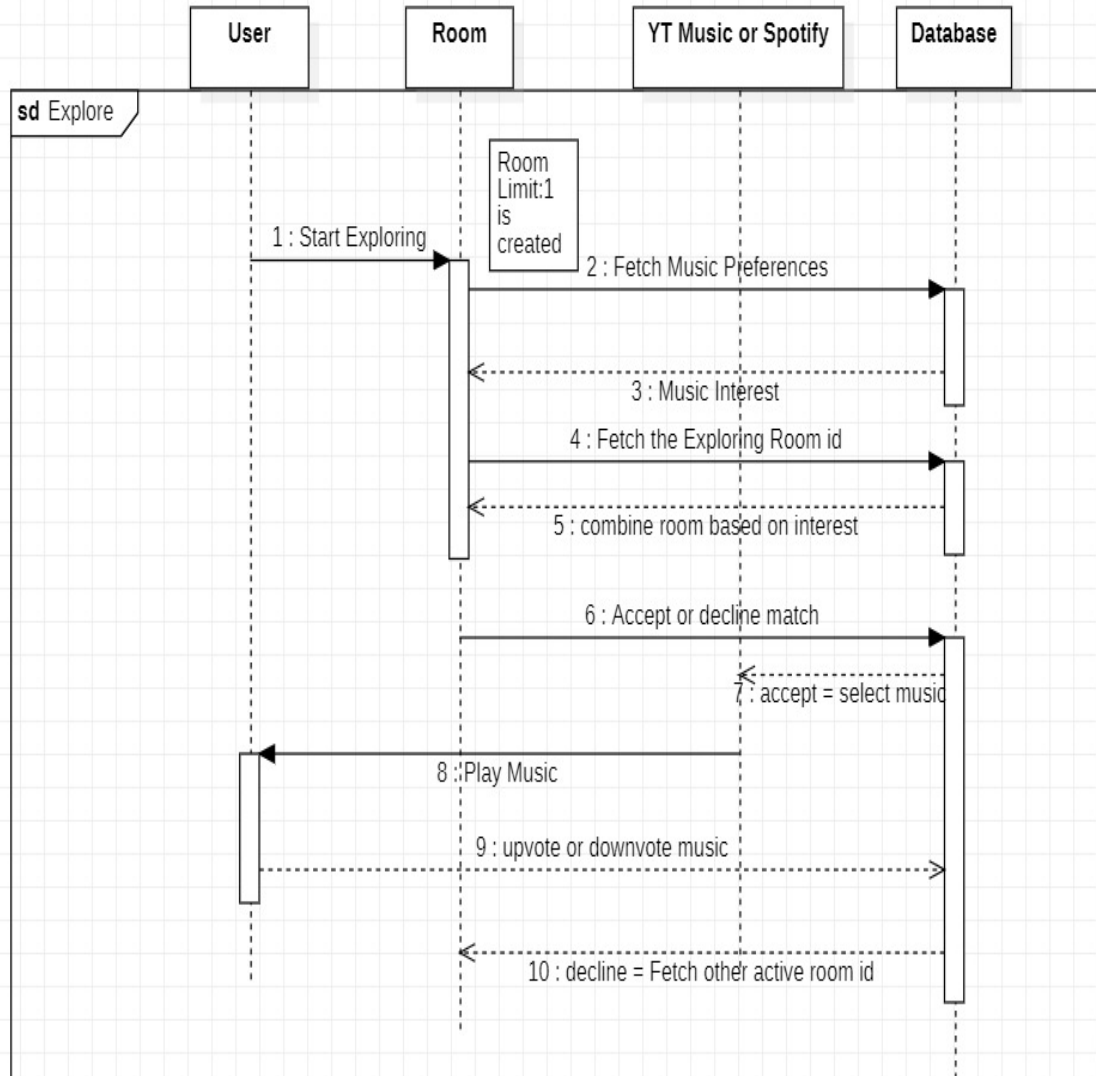

a) Login Process:

b) Create or Joining a Room:

c) Explore Music in Rooms:

d) Streaming Music:
